Jaquar faucets provide a great experience with their high quality and high performance. Jaquar's in-house, award winning design team is well integrated in its approach and our state-of-the-art manufacturing units are backed by a world class testing lab. That's why Jaquar faucets conform to the highest quality and regulatory standards. Jaquar's passion for perfection reflects in the 10 years of warranty it extends on its faucets. Today, Jaquar faucets have about 60% of the market share with a complete range of single-lever, quarter turn and multi-turn faucets.

FAUCET TECHNOLOGY

Cartridges

The heart of every faucet, the cartridge is responsible for controlling water supply.

- Jaquar cartridges are 5 lacs cycle tested to give a longer and trouble free operating life of upto 20 years (considering 60-70 operations per day)
- Wide angle of lever provides extra comfort and flawless, smooth operation
- Our cartridge spindle is made of brass instead of plastic, to avoid breakage
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5 -5 bar)
- Recognised and approved by national bodies NSF -USA, ASME-USA RAS-UK,ACS-FRANCE

Aerators

Devices that mix air with water to give a soft and splash-free flow.

- Our integrated honeycomb-structured aerator, provides lime buildup protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles

Chrome Finish

Upper shiny protection layer provides a mirror finish to every faucet.

- High plating thickness (Nickel: 10 microns and Chrome: 0.3 microns) provides tolerance to extreme climate and water conditions
- 450+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer time.

i-FLUSH

Installed directly in the pipeline, the i Flush concealed flushing mechanism has multiple aesthetic and design advantages. It also provides a more appropriate mechanism of flushing, using the available water pressure to create better siphoning at the trap and superior clearing of waste.

i-Flush advantages

- Repeated flushing is possible, whereas concealed cisterns will definitely take time to fill up after flushing once
- i-Flush 32 mm can work efficiently at even low pressure (minimum 0.8 bar dynamics)
- Less noise in flushing
- Dual flush - Saves water, a green product
- Easy maintenance, control stop valve can be closed with the help of a T-type key provided along with the product
- Access to control cartridge by removing front actuation plate hence easy accessibility for maintenance

SAUNAS

A Sauna is a bathhouse or room, usually made of wood, which uses dry heat to induce perspiration, with steam being produced by pouring water on heated stones. Perspiration or sweating is one of the main ways our bodies get rid of the traces of hundreds of toxins that accumulate inside us from pesticides, drugs and manmade chemicals. 15 minutes in a Jaquar sauna can help us sweat as much as we might otherwise do over an entire day or more. And the benefits of this aid in many medical conditions.

Why Jaquar Saunas?

Detoxification

Saunas stimulate the body to release fat-soluble toxins, heavy metals, and other toxic chemicals in sweat via pores more effectively than any other form of heat therapy or exercise. Reports have shown that it can relieve the symptoms of drug-induced lupus. The list of chemicals claimed to be removed from the body includes: mercury, lead, copper, cadmium, manganese, sodium, chloride, arsenic, nickel, benzenes, street drugs, prescription drugs, anaesthetics, cholesterol, urea, nicotine, sulfuric acid.

Immune System Enhancement

A typical sauna session will cause a brief 1 to 3 degree F increase in body temperature. Fever is the body's defence against bacteria, microbes and consequent infection. The production of white blood cells by the bone marrow and killer T cells by the thymus results in boosting immunity, overall.

Stress Relief

Continuous strain on the autonomic nervous system leads to a high level of stress, one of the elusive causes of many chronic diseases.

Pain Relief and Control

It helps in relieving muscular pain, cardiovascular and other skin conditions

Skin Cleaning and Rejuvenation

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

STEAM SOLUTIONS

For those seeking wellness in the comfort of their homes, Jaquar steam solutions are a great way to enjoy the benefits of humidifying water vapour from a high-quality steam generator.

Why Jaquar Steam Solutions?

Features:

1. Made from co-extruded acrylic that resists discolouration
2. Ensures long-lasting durability and performance
3. Hygienic material for a cleaner, safer experience
4. Smooth surfaces for effortless maintenance
5. Equipped with tempered glass shower enclosures for easy cleaning

Advantages:

1. Stability and Mechanical Resistance

Jaquar shower boxes are characterised by stability and solidity thanks to the zinc-plated steel frame that ensures maximum rigidity of all the components. Stability and mechanical resistance are also the attributes of the shower tray reinforcement.

2. Easy Installation

The installation of the shower boxes is as easy as it can be: the metal frame carries the elements and is simply put together.

3. Digital Control

It allows you to manage all manual control functions including sequential back rain jets, back jets, waterfall cervical massage, duration of vertical hydromassage, steam bath function, light, radio and white LED lighting

4. Control Units

All the hydromassage shower functions can be simply adjusted through easy-to-use control units.

5. Manual Control

It allows you to manage the shower head and vertical jets, as well as activate the steam-bath function.

Benefits:

1. Clearer skin

Steam showers have the ability to unclog pores and remove deeply trapped congestion from under the surface of the skin

2. Infection treatment

A major benefit of regular steam showers is relief from respiratory infections

3. Increased circulation

Steam showers are an excellent way to naturally boost circulation throughout the body. Increased circulation brings more oxygen to cells and decreases the risk of hypertension, hardened arteries and muscle function

4. Stress relief

One of the most powerful benefits of steam showers is their ability to reduce both physical and mental stress

BUILT-IN BATHTUBS

The more common and practical choice in bathtubs, the built-in or 'drop-in' bathtub is preferred wherever space is at a premium. Because they are placed adjacent to a wall and tucked away, built-in bathtubs are space-economical and can also offer additional storage on the surrounding ledges or the walls next to them. Perfect for placing an aromatic candle or two while you soak in the bubble bath and unwind!
